FOOD DISTRIBUTION ADMINISTRATION
Requirements and Allocations Control
June 30, 1943

881677.

KEY TO BALANCE SHEETS

- White: Non-civilian trial balance sheet of available supplies against the requirement estimates received from all non-civilian claimant agencies:
- Blue: Trial balance of available supplies against the requirement estimates received from all claimant agencies. These estimates have not been reviewed by an Inter-Agency Commodity Committee.
- Pink: Revision of trial balance, incorporating allocations suggested to the Director of the Food Distribution Administration on the advice of the appropriate Inter-Agency Commodity Committee.
- Green: Recommendation of the Director of Food Distribution Administration to the War Food Administrator after consultation with the Inter-Agency Food Allocations Committee.
- Yellow: Allocation made by the War Food Administrator after consultation with the Food Advisory Council and in most cases after consultation with the Combined Food Board.

Each balance sheet is accompanied by a supplementary table of the same color giving a more detailed statement of requirements (or allocations) by claimant agencies.

Only the latest stage in the fiscal year allocation procedure is shown for each commodity group.

a/ Allocation by the War Food Administrator, July 2, 1943.

b/ Fruit and Vegetable Branch, FDA.

c/ Recent estimates indicate that production will be considerably above the earlier estimate of 68 million bushels, possibly reaching 100 million bushels. To make the 100 million bushels available for distribution, however, a strong purchasing and storage program must be carried out by the FDA in all sections of the country where sweet potatoes are produced.
